

Stroke affects

over **6000** people

each year in Greater

Manchester

**CONNECTED
HEALTH CITIES**

A nhsa project

We are using patient information to improve the diagnosis & treatment of stroke by:

Improving the recognition of stroke by paramedics to ensure patients go to the right hospital, at the right time, for the right care.

Ensuring that stroke survivors get all the right treatments that they need to reduce the risk of another stroke

Providing timely and focused referral to neurosurgery for patients with stroke caused by brain haemorrhage
